

ROBLOX

roblox

Roblox is an online game platform and game creation system developed by roblox corporation. You can program games, and play games created by other people. And the logo has changed throughout the years.

More information

it's initial release date was in september 1 2006,it mostly got popular because people started creating videos about it on youtube, now a lot of youtubers are famous because of roblox.

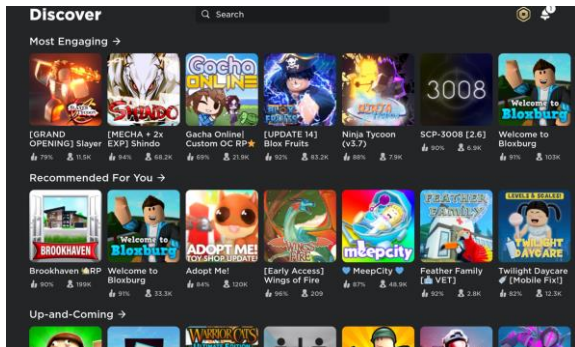

Roblox used to kind of look like legos, but they decided to change it up in 2010, because they were subject to a lawsuit by LEGO, because of their similarities. You can also create your very own avatar. But it costes robux. Which is basically the games cash.

scams

Roblox may look fun. But there are A LOT of scams. One of the old scams that almost nobody falls for is the free roblox scam on the roblox sight. Somebody tells you “do you want free robux” and asks for your roblox password. And if you tell them your actual roblox password ,they will hack into it and steal your account.

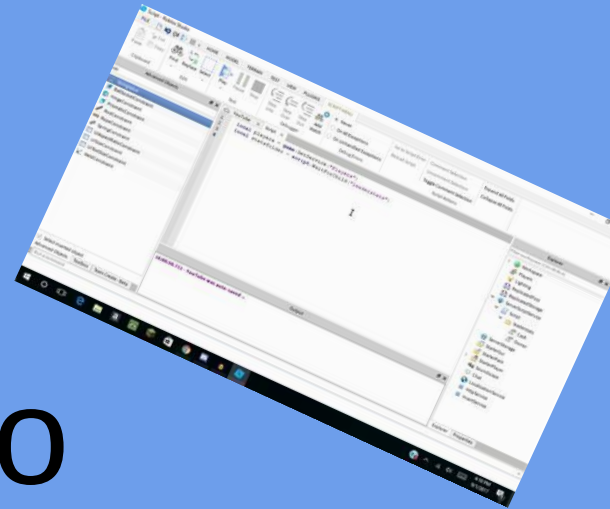

One way to protect your account is to add an email address to your account, this way even if somebody guessed your password they need a code to get into it. That code will be sent to your email that u out on the account.

It's games

Roblox has millions of games, like the most popular one. Brookhaven! But one of its games that used to be the most popular, Adopt Me. Was one of the games with the most scams used to be the most popular games on the platform. It still makes the same amount of money though. You have your very own game when you create an account as well! But sadly it has no coding which you need to add in it in order to have a good working Roblox game.

Roblox studio

Roblox studio is a whole nother app.but it is connected to roblox. Because you use it to create games on it which every roblox developer uses to create their games. You can create your own models there for your game. Some models may have viruses so be careful! To actually create a game you need know coding so players can do stuff. If ur game will take days (most likely will) maybe even months, you probably should save it.

robux

Robux is the games currency. you can use it to change ur avatar, use it in games and more. The prices are \$1 for 80, \$5 for 400 and \$10 for 800. Those are just the mobile prices. The prices for pc are \$5 for 400, \$10 for 800 again, and \$50 for 5000 and \$100 for 10000. If you have premium it gives u more robux. there are even gift cards u could use to get robux! There online and in stores to. There even used to be tickets that got removed long ago! They were used to buy robux. But they removed it.
