

Research one area that has been affected by a water shortage, and write an informative essay describing how people are responding to this shortage.

Djibouti is one of many places that has had water shortages. Since 2009 Djibouti's drought has gotten worse. Since the country does not have a permanent source of surface water such as rivers or fresh water lakes, the country must rely on deep underground water tables, fed by rainwater infiltration, where they exist. Preventable communicable diseases can happen with no water.
