

Universal studios

By:Renya

What is universal studios?

Universal Studios is a very big and fun theme park in North Hollywood! Universal was built July 15, 1964, and the founder of Universal Studios is Carl Laemmle. Every year they celebrate holidays by full out decorating the whole theme park and it looks so festive and nice. Universal has super fun rides, including roller coasters!!! They have different themes of rides that are from movies and famous TV shows, that are in different locations. There is also a tour bus that shows you behind the scenes of some of the movies. They showed me some of the cars that have been played in jurassic park.

The Halloween Horror Nights!!

Universal always does this halloween night where they make people dress up in really scary costumes and chase people and scare them. Universal also makes these haunted houses that are full of people ready to jump out of somewhere and scare you!!

Universal Christmas Nights!!

Universal Christmas nights are just the best. When i went to the Christmas night i had a blast. There was a stage full of people singing and acting like the characters from the grinch. There was also ice skating which i loved. And every time it's christmas universal puts a huge show/Movie on hogwarts castle and it looks so nice.

The Mummy!!

The mummy is a roller coaster ride based on ghosts and dead things like mummies. Personally this is my favorite ride. It is so fast, and it goes backwards. The mummy is very well decorating, It seriously feels like your in egypt. The mummy has mummies hanging down from the ceiling, That are ready to spit on you. Before the ride goes really fast, there is a mummy reading a book counting down, And then that's when the ride goes extremely fast. And the you crash into the the wall, there is a spray to spray you and it feels like cockroaches are walking all over your legs, and what makes you think cockroaches are on you is because they show a video of cockroaches.

Transformer

This transformer ride is made with graphics. What's so cool about this ride is that you in the movie, your in a robots body and you have to wear 3D glasses to make the ride more interesting. This ride has a part where we fall off a building and it feels so real, and there is a part where a bullet comes right in front of your face, and they added something to blow hot air in our faces so whenever there is an explosion it feels real!!

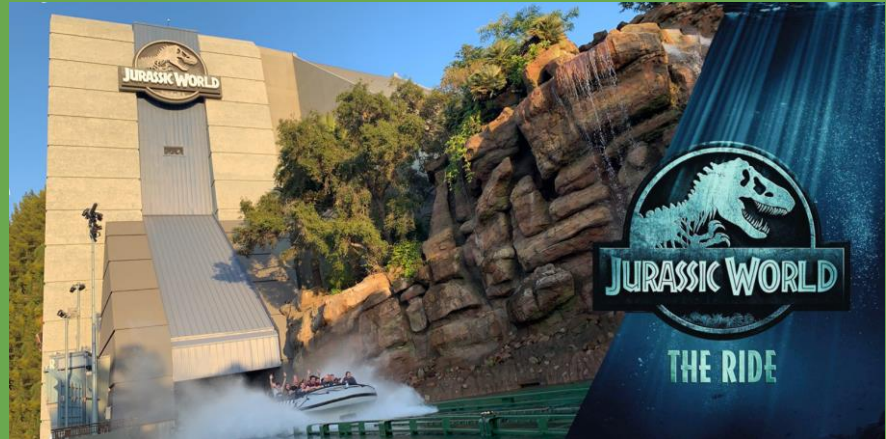

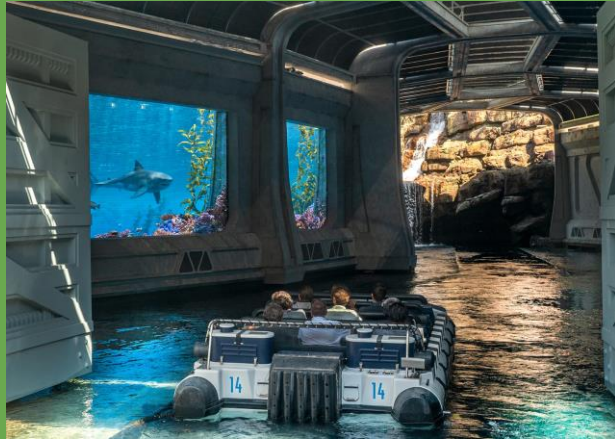

Harry Potter Ride

The Harry Potter ride was built June 18, 2010. The Harry Potter ride is a very realistic ride, everything in the ride looks like it's real. They show all the kids from hogwarts playing Quidditch, which is kinda like volleyball. And since it's 3D it feels very real! And the ride is based on flying so it also feels like your flying.

Jurassic Park!

The Jurassic ride feels like you're in a whole other world. It's full of dinosaurs and mysterious creatures! In the beginning of the ride there is a huge dinosaur underwater ready to break the glass and splash us with a bunch of water. And at the end there is a huge T-Rex that is ready to eat us, and right after that... There is a 100 foot drop!!!

The new rides

There is a new ride called the secret life of pets and it feels like your in the cartoon. For the seats your in a box ready to get delivered and we also get transformed into dogs! There is also Super Nintendo world coming soon!!

Before and after

The founder

Carl Laemmle

The image features a black background with two red curtains on the left and right sides, framing the central text. The curtains are drawn back, revealing the black space. The text "The End" is written in a white, serif font, centered horizontally and vertically.
